Contents

List of contributors vii

1 Natural history of mammalian spermatozoa in the female reproductive tract 1
Erma Z. Drobnis and James W. Overstreet

2 The chromosome complement of human gametes 47
Patricia A. Jacobs

3 Cooling, cryoprotectants, and the cytoskeleton of the mammalian oocyte 73
Caroline Vincent and Martin H. Johnson

4 Vaccination against pregnancy 101
Ming-Wei Wang and R. Brian Heap

5 The gonadotrophin receptors: insights from the cloning of their cDNAs 141
Deborah L. Segaloff and Mario Ascoli

6 Differentiation processes of granulosa cells 169
Anne C. Paton and W. P. Collins

7 Endocrine control of steroidogenesis in granulosa cells 225
Randall J. Urban and Johannes D. Veldhuis

8 Olfaction and reproduction in ungulates 263
W. Derek Booth and Jean-Pierre Signoret

9 Behavioural endocrinology and reproduction: an evolutionary perspective 303
David Crews
